

ERD & Relasi Antar Tabel

Basis Data (IF202)

Desain Database

ERD

ERD memodelkan entitas, atribut, dan relasi sebagai blueprint database.

Jenis Relasi

Relasi	Contoh	Implementasi
1:1	User ↔ Profile	UNIQUE FK
1:N	User → Posts	FK di sisi many
M:N	Student ↔ Course	Tabel pivot

```
CREATE TABLE course_students (  
  id UUID PRIMARY KEY,  
  course_id UUID REFERENCES courses(id),  
  student_id UUID REFERENCES users(id),  
  UNIQUE(course_id, student_id)  
);
```

Ringkasan

1:1 pakai UNIQUE FK, 1:N pakai FK di sisi many, M:N pakai tabel pivot.
Pertimbangkan ON DELETE (CASCADE, SET NULL, RESTRICT).
