

Anomaly Detection

Data Mining (IF211)

Advanced Mining

Anomaly Detection

Anomaly detection mengidentifikasi data point yang menyimpang dari pola normal.

Pendekatan

Metode	Tipe	Use Case
Z-Score	Statistical	Normal distribution
IQR	Statistical	Non-normal data
Isolation Forest	ML	High-dimensional
Autoencoder	Deep Learning	Complex patterns

Ringkasan

Statistical (z-score, IQR) untuk simple data. ML (Isolation Forest) untuk high-dimensional. Deep learning (autoencoder) untuk complex patterns. Use case: fraud, network intrusion, defect.
