

Classification (Decision Tree, SVM)

Data Mining (IF211)

Clustering & Classification

Classification

Classification memprediksi kategori dari data berlabel.

Algoritma	Pros	Cons
Decision Tree	Interpretable, no scaling	Overfit, unstable
SVM	Effective high-dim	Slow large data
Random Forest	Robust, no overfit	Less interpretable

Ringkasan

Decision Tree interpretable tapi overfit. Random Forest (ensemble) lebih robust. SVM bagus untuk high-dimensional. Pilih berdasarkan data size dan interpretability needs.
